

# SPARE BATTERY RACKS

## Integrated Critical Power Solutions

### SBR (Spare Battery Rack) Systems

#### REDUCED DOWNTIME

Replacement batteries are kept onsite and fully charged, enabling immediate battery replacement when problems are found.

#### NETWORK PROTECTION

The longer low or weak batteries remain online, the higher the risk for network vulnerability and potential damage to the rest of the battery string. With proper planning, spare batteries can be from the same lot or manufacturing date as the existing battery string.

#### TOTAL COST OF OWNERSHIP

Multiple site visits are eliminated when spare batteries can be swapped out at the time of inspection. This will also eliminate costly expedited freight charges to ship replacement batteries to the site.

SBR3

SBR4

The **SBR Rack Series** are designed to provide a convenient solution for keeping fully charged spare batteries onsite. They are an open frame design for easy access to spare batteries. Includes a rack or wall-mountable multi bank, temperature compensated charger that can accommodate any battery type.

#### SBR Standard Features

- 115/130 VAC Standard AC input
- Rack or Wall-Mount Charger
- 3 Amp DC output per bank
- DC Volt Meter
- Temperature compensation
- Hot-swappable removable harness on each battery
- Visual and resettable reverse polarity protection
- Compatible with all VRLA top and front terminal batteries of any DC voltage
- Available in multiple colors
- CUSTOM sizes available
- Available for front terminal batteries

MB3-12 Charger

SBR Series Battery Capacity				
Battery Size	SBR1	SBR2	SBR3	SBR4
100 - 150WPC	7	14	21	28
200 - 210WPC	6	12	18	24
300 - 620WPC	5	10	15	20
Call to size in non-standard battery sizes (2, 4, 6, 16 Volt...etc)				

Overall System Specifications				
	Width	Depth	Height	Weight
SBR1	38"	15.5"	9"	33 Lbs
SBR2	38"	15.5"	26"	60 Lbs
SBR3	38"	15.5"	46"	89 Lbs
SBR4	38"	15.5"	67"	120 Lbs
